

Humanity in the Loop

Memorial University Business Day 2026

What kind of leader will you be in the age of AI?

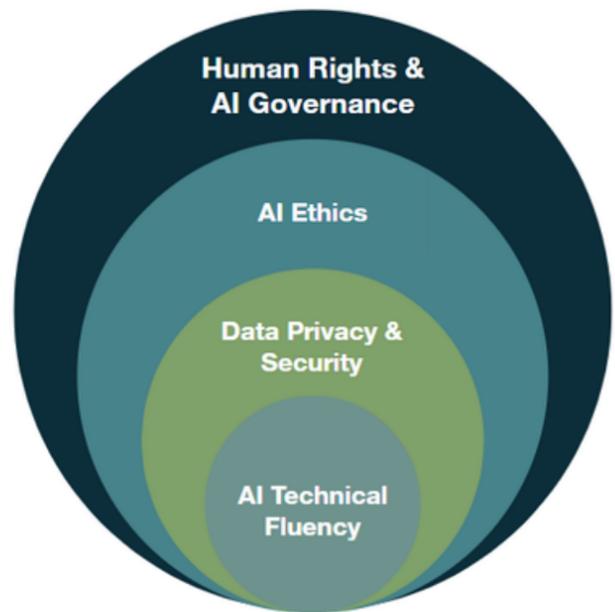

The Super 6 Critical Leadership Skills in Age of AI

Skill	Leadership Action	The "Human" Edge
Creativity	Envisioning what doesn't exist yet.	AI only predicts; humans imagine.
Curiosity	Asking "Why?" and "What if?"	AI answers; humans question.
Critical Thinking	Verifying AI outputs for "hallucinations."	Logic vs. Pattern Matching.
Adaptability	Thriving in "Always-in-Beta" environments.	Pivoting when the data changes.
Empathy	Managing the "Warm Handoff."	Connecting on a felt, emotional level.
Ethical Judgement	Being the moral compass of the algorithm.	Choosing "right" over "efficient."

Responsible AI Imperatives

As a leader you need ensure you are paying attention to all layers of the framework:

- Human Rights & AI Governance: Ensuring technology respects fundamental rights and liberties.
- AI Ethics: Moving beyond what we can do to what we should do.
- Data Privacy & Security: Protecting the core assets of the digital age.
- AI Technical Fluency: Understanding the tool well enough to direct it and audit it effectively.
